### How does it work?

The BillShrink feature allows our customers to view and redeem rewards during secure WealthManager Online Banking sessions. Rewards are determined by recent transactions from their favorite merchants and service providers.

Personalized Bill Analysis uses BillShrink's proprietary technology to automatically review our customers' accounts and recommend ways for them to save money on recurring monthly bills such as wireless telephone, TV service and gas purchases.

BillShrink is an optional service, and can be turned off by clicking on the  [Disable Offers](#) link found at the top of your account transactions screen, where the offers are displayed.
